Here's how CapCut creates a video collage

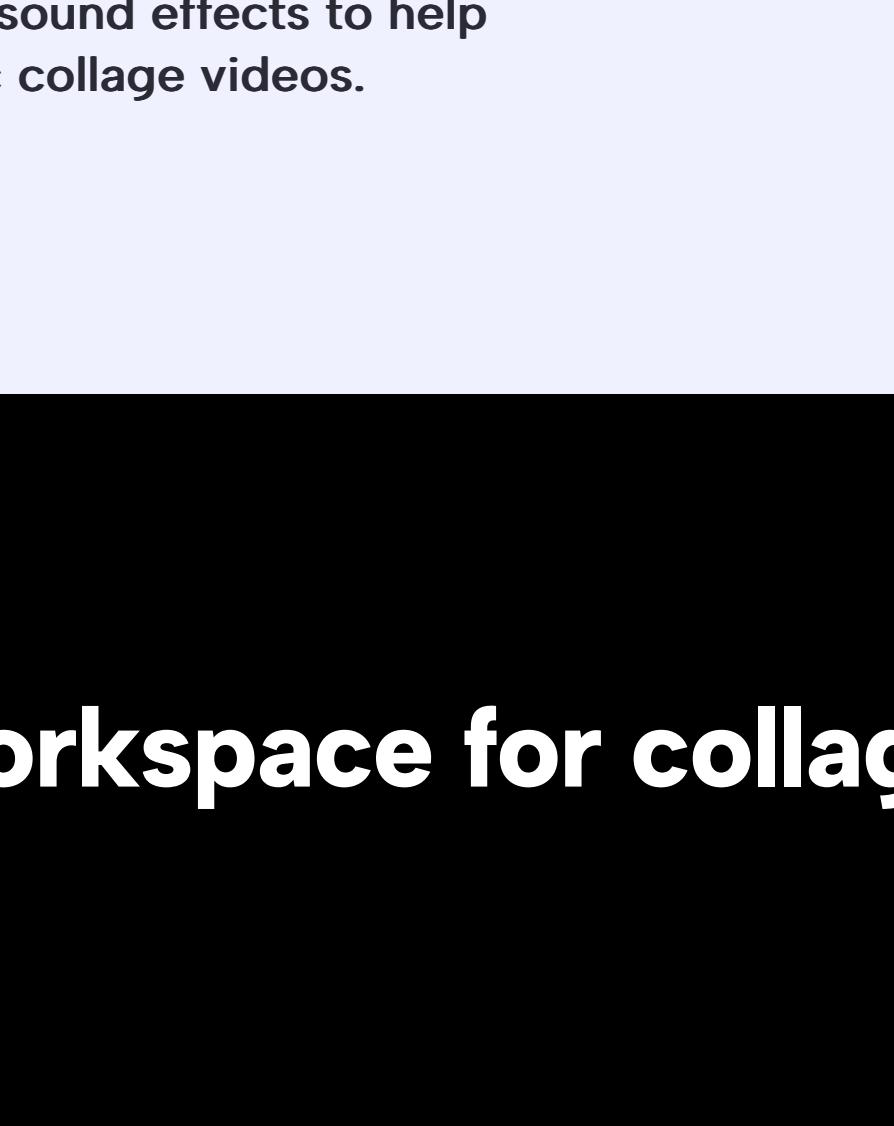

Start creating the canvas

Import media, arrange layout, customize with effects and music, preview, and save your video collage. It's a simple and intuitive process to create stunning visual compositions.

Personalize the collage video

Select photos and videos, choose a collage template, arrange media, apply filters and transitions, add music, preview your creation, and export the final video collage. Create impressive visual stories effortlessly.

Export video at MP4, 60 fps

After you preview your collage by customizing it with effects, music, and text, you need to save or share it to let more friends know about your perfect video.
