Here's how CapCut makes a photo video easily

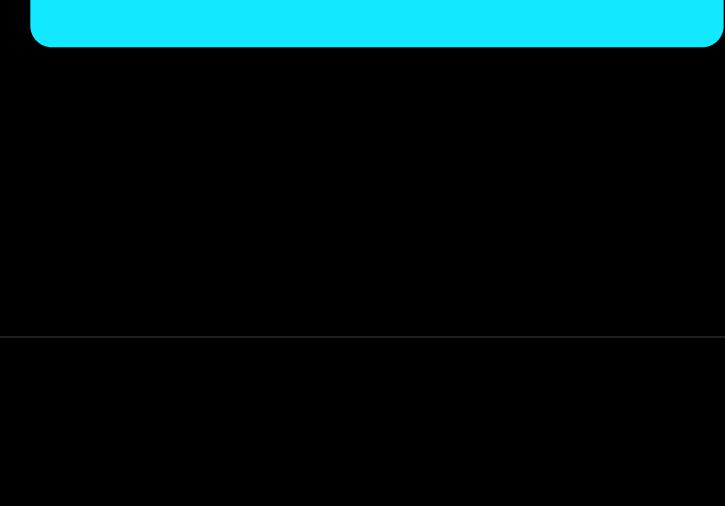

Step 1: Log into CapCut. Add photos to the track or choose a photo video template

CapCut online photo video maker the same way you would upload a video. To save time, consider uploading multiple files at once. Or, you can pick up the custom-made TikTok or YouTube photo video template to start. The left sidebar allows you to pick up a customized dimension for your photo slideshow.

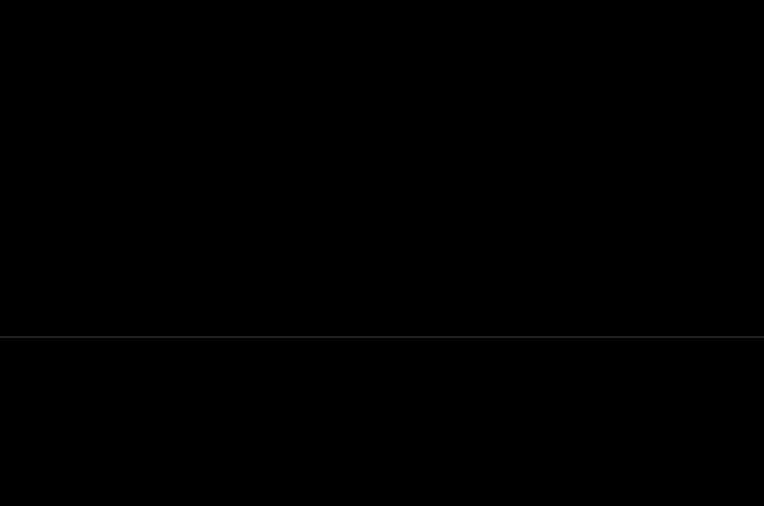

Step 2: Add music to your photo video. Utilize Video Cropper, Trimmer, and Speeder

Bring your photos into the timeline. Adjust the length of time that each photo appears on the screen with the Video Trimmer. A good rule of thumb is to show photos for between 1-4 seconds. You can use the Speeder, Splitter, Resolution Converter, and more tools to enhance the project.

Step 3: Set the quality of your photo video, and then export or share it directly

Make your video well-rounded with stickers, text, and background music. Don't forget to add transitions between your photos for a clean, polished finish. When exporting, you can choose 1080p or 4K, in MP4 or MOV. Also, you're able to share the photo video on social media like TikTok. Keep in mind that CapCut's photo editor has no watermarks.
